General Purpose Container 6.5m² with Sump

Specifications	
External Dimensions	L2184mm x W2928mm
Max O/A Height	2198mm
Sump Capacity	560 Litres
Net Weight	650 Kg

This bunded steel cabinet is designed for general use applications and can be used outside. The structural frame is covered with 0.6mm galvanized sheet steel to help protect against the weather elements. 2 hinged doors are located in one short side, and each door has 3 air vents in both the top and the bottom. The doors are secured with a Kale mortise lock for good security. The base sump is seam welded from 2mm galvanized sheet steel with a capacity of 560 litres and is mounted on steel plinths to raise the sump off the ground Inside the storage container are 2 sets of shelves down each long side with an impressive load capacity of 60kg per shelf, evenly distributed These steel storage container sumps are well designed to offer good strength for a long serviceable like but at economic cost. The storage containers are supplied fully assembled
