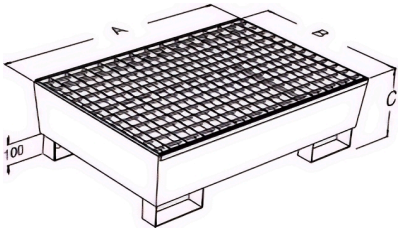
Product Overview

Z/SAL/EKON102Z



Budget Galvanized Sump Pallet for 2 Drums

Specifications	
Dimension A	1200mm
Dimension B	800mm
Dimension C	340mm
Drum Capacity	2 x 200 L Drum

This galvanized steel sump pallet is from our Budget range of tapered spill pallets and is designed for safely storing and handling 2 x 200 litre drums of hazardous or flammable substances. The spill pallet is constructed of solid carbon steel and certified watertight Ideal for safely storing small containers each pallet comes with a removable hot-dip galvanized grid and conforms to the highest level of certification. The pallet is supplied with a warning panel and identification plate fitted to the sump, user manual and a registration booklet with test certificate Thanks to the tapered construction the sump pallets can be stacked inside each other, allowing a reduction in space during transport or storage UNI ISO 3834-3: 2006 Each containment spill pallet is subjected to non-destructive testing to ensure the basin is watertight in case of spills. This process is applied according to the following standards UN EN ISO 9712: 2012 Non-destructive testing Qualification and certification of personnel involved in non-destructive testing
