Universal Absorbent Granules

Specifications	
Material	Fine volcanic granules
Dimensions	300x200x500
Weight	1050kg (15kg per)

This is granular absorbent material, the material is made up of fine volcanic granules, it doesn't contain crystalline silica dust and poses no health hazard to the user. The granules absorb and retain liquid making it easier to remove once used leaving a dry and safe flooring. These absorbent granules are not suitable for hydrofluoric acid.
