Weight	181kg
UDL	3000kg

This Polyethylene double IBC sump pallet is suitable for the majority of IBC footprints and comes with removable deck grids. Will fit standard 1000 litre IBC tanks. This is a sump pallet for the spill containment and storage of two IBC (Intermediate Bulk Container) or drums on a pallet. The IBC bund is covered by a steel frame complete with a fabric roof cover and sides to allow the sump pallet to be kept outside. The front door has sturdy zips on each side and ties to hold up the rolled up door when the sump pallet is in use. The cover keeps the weather out and most importantly prevents rainwater from filling up the sump. The strong and durable sump pallets come in a bright yellow color and are of a nestable space saving design. In addition, the sump pallet has a removable grid to make cleaning / emptying of spills easier.
