

Polyethylene Storage Cabinet for 1 IBC COM-ECOBX1IBC

Product Overview

Z/COM/ECOBX1IBC

Sump Capacity

1100 L

Polyethylene Storage Cabinet for 1 IBC

Specifications	
Dimensions	1540x1600x2350 mm
Capacity	1100 L

This is a high quality polyethylene storage cabinet with a removable and independent IBC support stand, used instead of a grill, for safely storing and handling 1 IBC (Intermediate Bulk Container) outside. Constructed from high density polyethylene and manufactured using a rotational moulding process, these sump pallets are ideal for storing various acids, alkaline solutions, oils and non-flammable chemical substances. The spill cabinets allow easy handling by forklift truck because of the special base construction. The internal IBC support is removable and can be used independently. Key features of the polyethylene cabinet include: Suitable for the outside storage of an IBC; Sturdy and strong cover with two swing doors; Four ventilation grills in the front doors; avoids dangerous internal saturation; Large supporting surface for easy storage; Volume 1100 litres including internal support; Strong construction with lowered design for easy access to the IBC.
