Insulated Cabinet for 2 IBC

Specifications	
Dimensions	2929x1867x2392 mm
Net Door Opening	2690x1885 mm
Inner working Depth	1670 mm

This premium thermally insulated storage cabinet is suitable for the outside safe storage of up to 2x 1000 litre IBC's (Intermediate Bulk Containers) The high quality cabinet frame is constructed frommm galvanized steel and then further overpainted. The collection tank is equipped with a removable galvanized grid The cabinet is fitted with insulation. The insulation consists of 50mm mineral wool which is fitted between the galvanized panels As well as protecting against thermal shocks, in cold weather insulated containers can help maintain a minimum temperature inside the cabinet and thus reduce the viscosity of stored substances. In hot weather they can help prevent dangerous heat build up The height of the cabinet allows the use of transfer tilted support stands from within the cabinet to facilitate pouring operations (sold separately) The collection tank is constructed from steel with a galvanized grid and conforms to the highest level of certification and is supplied with a warning panel and identification plate fitted to the sump
