The polyethylene tank is suitable for containing acids, alkaline solutions and fluids compatible with polyethylene (GHS categories 1 – 4). The large monolithic tank is closed by a removable polypropylene grid suitable for storing drums and tanks, which can be moved empty with a pallet truck and forklift. Constructed from high density polyethylene and manufactured using a rotational moulding process, these sump pallets are ideal for storing various acids, alkaline solutions, oils and non-flammable chemical substances. This high quality pallet is manufactured in RAL 6018.
