

Polyethylene Sump Pallet For 3 Drums

R-BP3

Product Overview

Z/R/BP3

Sump Capacity
228L

Polyethylene Sump Pallet For 3 Drums

Specifications	
Dimensions	780 x 1785 x 240mm
Sump Volume	228L
Drum Capacity	2 x 200 Litre Drum
Weight	30kg
UDL	900kg
Material	low-density polyethylene, it

This plastic sump pallet is an option for fitting 3 drums on one sump, in a neat and organised way. The triple sump is suitable for everyday rugged use. Constructed from high density polyethylene and manufactured using a rotational moulding process, these sump pallets are ideal for storing various acids, alkaline solutions, oils and non-flammable chemical substances. The removable supporting grids allow for easy cleaning. This range of spill pallets is designed to optimise space and lower transport costs by means of its interlocking design, allowing the sump pallets to stack within each other.
