| Group Pack Size (Height)    | 9 (2500mm)          |
| Colours available           | Yellow and blue     |

This plastic sump pallet is an option for fitting 4 drums on one sump. The 4 drum sump is suitable for everyday rugged use and has extra room in the sump to collect more liquid, 440 litres. Constructed from high density polyethylene and manufactured using a rotational moulding process, these sump pallets are ideal for storing various acids, alkaline solutions, oils and non-flammable chemical substances. The removable supporting grid allows for easy cleaning inside. The spill pallet bases are designed with slots at the bottom for easy handling by forklift truck or hand pallet truck. This range of spill pallets is designed to optimise space and lower transport costs by means of its interlocking design, allowing the sump pallets to stack within each other.
