R-GPT2

Product Overview

Z/R/GPT2

Capacity
230 L

Open Drip Tray with Ribs 230L

Specifications	
Dimensions	730 x 1290 x 295mm
Sump Volume	230 L
Weight	10kg
UDL	600kg

This open plastic drip trays is the largest of our range of lightweight drip trays. The sump is conveniently sized and for general purpose use. The rotational molding manufacturing process uses virgin polythene granules which results in a durable and tough drip tray. The tray base has ribs moulded in to raise any drums and cans above any small spills. The sump is open so there is no grid The polythene drip tray is suitable for most applications involving the handling and pouring of small containers of liquids and ideal in laboratories with a broad range of chemical compatibility
