| Weight                           | 350kg                          |

This sump pallet is a versatile solution from our range of internal spill pallets for safely storing and handling 205 litre drums. As standard, the base is fitted with channels to locate pallets of drums, as an option we can fit a galvanized grid for general purpose use and drum decanting - please see the photos. Constructed of 3mm sheet steel and watertight this spill pallet is designed to hold 8 drums vertically. The sump is fully seam welded with a capacity 1125 litres complying with all current UK regulations. The sump pallets are painted with a high build, quick drying primer/topcoat paint specifically designed for use directly on to metal or bare steel, this paint contains zinc phosphate anti-corrosive pigments and is applied with a minimum dry film thickness of 75 microns.
