Premium Sump Pallet for 4 Drums (Grid)

Specifications	
Dimensions	1300x1200x392 mm
Sump Volume	300 L
Drum Capacity	4 x 200 Litre Drum

The containment tank is suitable for collecting flammable liquids (GHS categories 1 – 3) and water pollutants (GHS categories 1 – 4). It can be moved by forklift or by hand, with the wheel and handle Kit (optional); To calculate whether the capacity of the tank complies with the needs, it must be taken into account that the tank must be able to contain at least the greater quantity between the volume of the largest container and 33% of the sum of the volumes of the containers placed above the tank itself This unit is modular and allows you to connect multiple tanks through the use of a coupling Kit The removable galvanized grid allows for easy cleaning. The spill pallet bases are designed with slots at the bottom for easy handling by forklift truck or hand pallet truck This range of spill pallets is designed to optimise space and lower transport costs by means of its nesting design allowing the sump pallets to stack within each other
