1200 L

Sump Floor Kit - BFKIT1

Specifications	
Dimensions	3320x2520x150 mm
Sump Volume	1200 L
Load Capacity	1000 Kg per section

This is a Kit of 4 rugged sump floor units with a low deck height of 150mm and includes connecting strips to join the sumps together to form the rectangular shape as shown in the picture, 3320mm x 2520mm. The square sides allow the sumps to sit flush next to each other and joining strips are available to lock the sumps together. Also included are threaded connectors which join together the sumps through pre-drilled holes in the factory, to increase the volume capacity of the overall floor to 1200 litres allowing IBC's to be safely stored within current regulations. The sump floor is moulded from 100% polyethylene and has an individual load capacity of 1000kg. The plastic grid is easily removable for easy cleaning. This sump floor Kit comprises the following: 4 off BF4 floor sumps - 1660mm x 1260mm 2 off BFS2 joining strips - 1260mm 2 off BFS4 joining strips - 1660mm 4 off BFC threaded connectors. Ramps available as an option.
