400 L

Polyethylene Drum Sump Holder

Specifications	
Dimensions	1250 x 1390 x 490mm
Sump Volume	400 L
Load Capacity	1250kg
Weight	50 kg
UDL	1250kg

This is a robust sump pallet for the horizontal storage and stacking of drums. This base sump unit, DB4, holds 2 horizontal drums and has a sump capacity of 400 litres. The sump base protrudes in front of the drums to catch any drips or leaks when decanting liquids from drums. Available as an optional extra is a 2 drum polyethylene cradle which can be stacked directly on the drums below. This is available as an option above to purchase online now. The strong and durable sump pallets come in a bright yellow colour and are moulded from durable (modified for strength) high density polyethylene (HDPE) and manufactured using a rotational moulding process. These drum sump pallets are corrosion resistant, therefore they cope with chemical spills and feature integral supporting stands without a grating. Ideal for the spill containment of storing various acids, alkaline solutions, oils and non-flammable chemical substances.
