

Polyethylene Racking Bund R-RB1&GRID

Product Overview

Z/R/RB1&GRID

Capacity
220 L

Polyethylene Racking Bund

Specifications	
Dimensions	1310x1310x245mm
Sump Volume	220 L
Weight	31kg

This useful sump bund sits on standard racking beams to allow storage of drums. The smooth deck grid can have the drums sit on directly or on a pallet. The plastic deck grid simply lifts out to allow easy cleaning of the sump after any drips or spills. The Racking Bund has a sump capacity of 220 litres making it suitable for the storage of full size 205 litre drums. The rotational molding manufacturing process uses virgin polythene granules which results in a durable and tough racking sump tray
